1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 33-39 and 43-44 are rejected under 35 U.S.C. 102(a or e) as being clearly anticipated by Miguel (6732611).

3. Claims 45-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miguel (6732611) in view of Cellini (5887305).

Miguel discloses all of the claimed subject matter except for having a cutting arrangement including a stationary portion, a displaceable support portion, cavities, a recess, and wheel shaped cutting members. Cellini discloses a corkscrew having a cutting arrangement including a stationary portion, a displaceable support portion,

cavities, a recess, and wheel shaped cutting members. It would have been obvious to one having ordinary skill in the art to form the device of Miguel with a cutting arrangement including a stationary portion, a displaceable support portion, cavities, a recess, and wheel shaped cutting members to allow for the seal on the bottle to be cut as taught by Cellini.

4. Claims 40-42 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Applicant's arguments filed November 30, 2007 have been fully considered but they are not persuasive. Applicant's arguments are moot in view of the new ground(s) of rejection.

Miguel discloses the elastic member, second connection and second movement as broadly claimed by applicant. See paragraph 2, above.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. S. Meislin whose telephone number is 571 272-4487. The examiner can normally be reached on Monday-Thursday.
